

EHEA Qualifications table

The European Higher Education Area (EHEA) qualification table is developed as a tool to support automatic recognition of foreign qualifications in the EHEA. The table provides an easy overview of all qualification types from the EHEA countries that could be considered for automatic recognition and give general access to the next level of study in the other EHEA countries. The qualifications are organized according to the three Bologna cycles and the corresponding EQF levels 5, 6, 7 and 8.

EQF level 8

Introduction

Information on Automatic Recognition criteria

The table includes information about the following three commonly used criteria for applying automatic recognition within the EHEA and the European Education Area (EEA), i.e. whether:

- the Lisbon Recognition Convention (LRC) is signed (▲);
- the national qualification framework is referenced to the EQF and/or QF European Higher Education Area (●);
- the national quality assurance system complies with the European Standards and Guidelines for Quality Assurance (ESG) (■).

Information on General Access

If the qualifications meet the above criteria, they can be considered for general access to the next level. However, it is essential to know if a qualification itself qualifies for general access to the next level in the home country (as some do not). Therefore, it is indicated for each qualification whether it provides general access to the next level. For this we used the following symbol: (★).

If you do not see this symbol, it may be that general access is not possible and/or additional conditions apply.

Co-funded by
the European Union

EU Disclaimer:

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

Usage

The document is clickable, allowing you to only select the countries and levels of your interest to see how they compare.

The table is primarily developed for the **ENIC** (European Network of Information Centres) and **NARIC** (National Academic Recognition Information Centres in the European Union) Networks centres and admissions offices/credential evaluators in higher education institutions who wish to directly apply “de facto” automatic recognition.

Additionally, the table offers provides transparency for policy makers in countries interested in more legalistic models of automatic recognition, such as unilateral binding list or bilateral/multilateral binding agreements between countries on automatic recognition.

Please note when using the table to apply automatic recognition as part of a credential evaluation process, you will still have to check if the programme and/or institution is quality assured (depending on the quality assurance system used in that particular country). The [Database of External Quality Assurance Results](#) (DEQAR) offers a one-stop shop to find this information. Additionally, you may have to do an authenticity check.

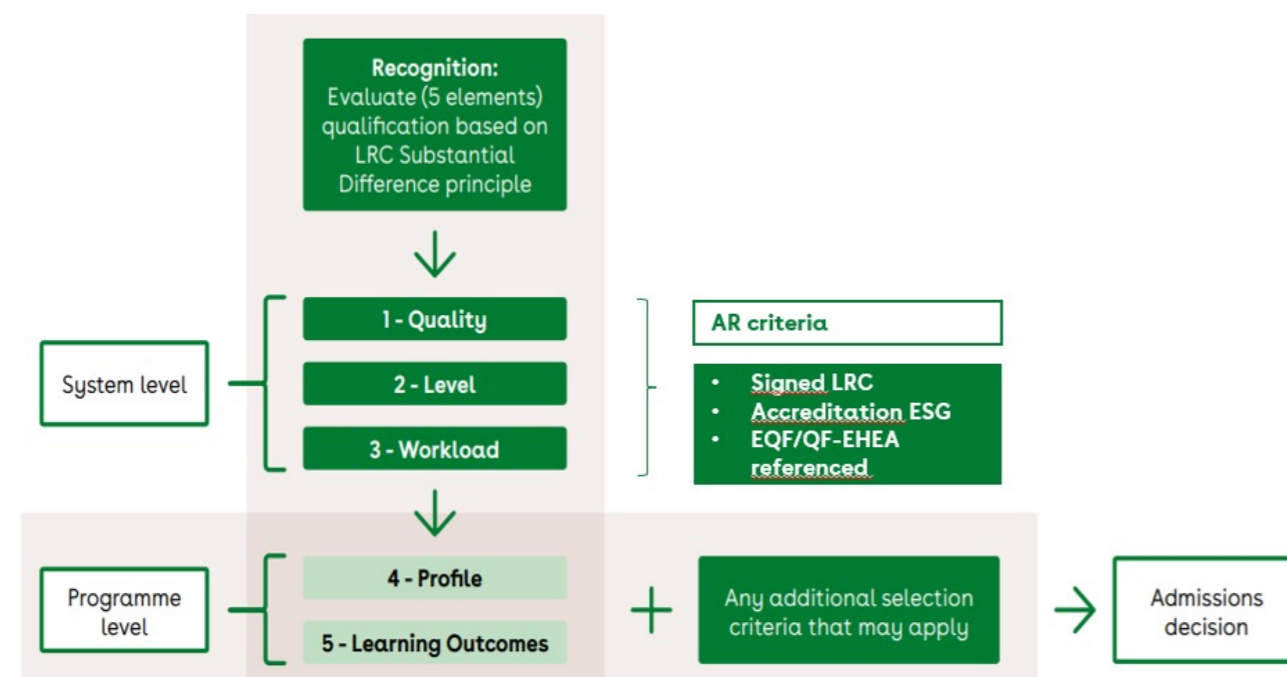

EQF/EHEA Manual

Automatic recognition

Automatic recognition is the concept where qualifications giving access to the next level of study in the home country are granted automatic general access to the next level of study in another EHEA or EEA country provided the pre-set criteria for automatic recognition are implemented in the home country.

It is important to understand for all users that automatic recognition is system level recognition and specific access requirements may still apply to enroll in a specific programme by the higher education institutions.

Automatic recognition as part of the recognition and admissions process:

Disclaimer This information is collected from the ENIC-NARIC Networks and is subject to changes in the education systems. While an effort will be made to keep the table up to date in the future, no rights can be derived or claimed. Users should check if the criteria for automatic recognition (Council Recommendation) still apply.

Sources

The information included in the table is retrieved from the ENIC-NARIC centres, based on authoritative sources such as EQF and QF-EHEA self-referencing reports. Compliance with the ESG has been based on the [country information](#) available in the European Quality Assurance Register for Higher Education (EQAR).

This table is produced as part the Erasmus+ AR25 project, co-funded by the European Commission.
